

# INTRODUCTION

## **BACK STORY:-**

in 1969, astronomers discovered a weird interplanetary device on the surface of the moon that makes it possible to travel to Mars in the speed of light. From there on humans colonized Mars in a period of 30 years... But the device was found to be unable to return visitors back to the moon or the Earth, therefore trapping anyone who uses it on Mars as long as they don't have a spaceship to return themselves!

in 2007 a war was set between the United Skies (the global superpower of Earth during then) and the Vers Empire (Mars's global superpower) because Terrans failed to supply Martians with necessary life supplies for a noticed while as they priced it to an unmanageable price, which forced the Martians to grab on their backup stockings and declare war on Earth! it later ended in 2011 after witnessing much horror and civilian casualties exceeding 230 Million souls.

in late 2018 and after long failed seeking for diplomatic solutions to prevent a second war from existing, the Vers Empire declared another war on the new global superpower "United forces of Earth" by launching a surprise attack on a Terran crewed satellites and eliminating them completely... the UFE had no choice but to declare war on the Vers Empire back.

the Vers Empire outrage focused on the commercial capitals in Europe and North America and attacking them repeatedly, committing the worst global crimes in human history and violating the law to its absolute limit.

Their (Surprisingly) advanced tech made resistance something of a nightmare, with unmanned giant combat robots being shatterproof and the use of perfect tactics!

if the Martians could manage to win the war, the Terrans shall give up all their rights in water, food and freedom of speech against the Vers occupiers!

in early 2019, the UFE started sending teenagers with an age not younger than 16 and not older than 20 years old to special secretive missions as OSS agents, after a scientific research reveal that said humans at such an age usually perform tasks better and more efficient than older men/women.

The war events continued and burned for 2 years as the two sides continue looking for ways to give them advantage over the other.

in January 2021, three best friends gets approved to be suitable for military service. They get sent to multiple missions, alone and separated from each other, to test their skills and this situation continued for months to follow.

in late June of the same year, the three regroup together as an order from the brigade commander to start their first mission together, Where they also meet Elaine.

Now their new official task; to remain together and breathing steadily!

## CHARACTER PERSONALITIES IN DERE ARCHETYPES:-

### UFE MAIN CHARACTERS:

(Lieutenant) Jackor: Kuudere, Yandere.  
(Corporal) Bryan: Hinedere, Oujidere (Maybe?!)  
(Sniper) Nash: Dandere, Utsudere  
(Private) Elaine: Deredere.

### VERS EMPIRE MAIN CHARACTERS:

(WIP, this list will be updated as episodes progress)

### PLACES KNOWN:-

#### ON EARTH:

Pacific airport.  
UFE exchanging campsite.  
One of Singapore's islands.

#### ON MARS:

(WIP, this list will be updated as episodes progress)
